

Do your patients need more support?

slappa's thongs have been specially designed to provide support and comfort to all shapes of feet. They are durable and can be worn for long periods of time, in wet and dry conditions.

Why your patients will love wearing slappa's thongs

SUPPORT AND COMFORT

- Inbuilt arch support that moulds to the shape of the foot, for a tailored fit.
- Straps are not as loose as on other thongs, so they hold the thong to the foot.
- Made from EVA soft, recycled foam, which, combined with built-in arch support, provides superior comfort.

PRACTICAL AND AFFORDABLE

- Waterproof and suitable for wear at the beach or even in the rain.
- No plugs, so they are sturdy and durable.
- For shoes with arch support, slappa's are surprisingly affordable. People often have more than one pair to suit all occasions.
- Sizes are available for the whole family, in a variety of colours.

- Our Podiatrist customers not only sell slappa's to their patients, but provide them as added value to the sale of their orthotics.

WHAT OUR CUSTOMERS SAY...

'My new slappa's arch support is right for my foot and they fit perfectly. They are a good solution for my plantar fasciitis as I can wear them with my foot unstrapped' – Rebecca

'So comfy, love my orange slappa's. My plantar fasciitis is in much relief, thanks Denise for your personal service' – Kate

your patients will never want to take them off!
